The Society for Art and Science (<http://art-science.org>) will hold the 11th annual international conference "NICOGRAPH International 2012" in Bali, Indonesia, in cooperation with Universitas Multimedia Nusantara, Indonesia.

Our NICOGRAPH has quarter-century history. Its foundation can be traced back to 1985. The time-honored annual conferences have been organized by the Society for Art and Science since 2000, which aim not only to technical or artistic topics in computer graphics and related fields but also to interactive and/or media art and so on. In 2002 the first international conference NICOGRAPH International 2002 was derived from the domestic series, and the international ones have been organized annually.

In addition to purpose of the domestic NICOGRAPH conferences, the international series mainly focuses to give good chances for young researchers and students to have English presentation and discussions with international young colleagues. The organizing committee and supporting members hope leaders of the next generation will rise in the academic, artistic and/or industrial field through this opportunity.

Topics and keyword of the conference include the followings, but not limited to: Computer Graphics, Arts content, Multimedia, Virtual Reality, Interactive Arts, Video game, Design contents, Web design, Movie production, etc.

As you know, Bali is an Indonesian island located in the westernmost end of the Lesser Sunda Islands, lying between Java to the west and Lombok to the east. It is also the largest tourist destination in the country and is renowned for its highly developed arts, including traditional and modern dance, sculpture, painting, leather, metalworking, and music. This exciting place must inspire us in the field of art and science.

Detailed information and author's schedule will be open soon. Please check the website (<http://art-science.org/>) or Facebook (<http://www.facebook.com/Art.and.Sci>).

We look forward to seeing you in Bali in next early summer.
